

Performance test your rollers

ARE YOUR ROLLERS PERFORMING AT MAXIMUM CAPACITY?

Servicing your machines regularly is very important to ensure reliable operation and a long service-life. With preventive service and pro-active maintenance you minimise the risk of high production costs and unscheduled stoppages. In addition to the regular service you can also get a professional performance test and inspection of your equipment to make sure that it is performing in accordance with the specifications.

► **Your benefits:**

- Professional analyse of your equipment
- Equipment maintained to original specifications
- Optimization of machine performance
- Lower cost of ownership

► **Following parameters are checked:**

- Frequency and amplitude
- Engine speed
- Propulsion pressure
- Vibration pressure
- Charge pressure

PERFORMANCE CERTIFIED

This machine is tested to be in compliance with Dynapac parameters
