

DYNAPAC

Part of the Atlas Copco Group

Taking CA250-II, CA260-II and CA280-II to the next level

We have improved Dynapac CA250/260/280 by so many new features that we are now proud to release the Series II of these machines: CA250-II, CA260-II & CA280-II.

All together 9 new soil compactors. Compaction performance remains on top, but the rear view is improved and service made easy.

For the four cylinder engine, the noise level is 2 dB(A) lower with the plastic hood, even without the vandal side covers.

Top compaction, proven reliability, highest safety

- ▶ **Noise reduction** – Even without the vandal side covers (included in EU/CE package), plastic hood gives 2 dB(A) lower surrounding noise LwA*.
- ▶ **Serviceability** – The new hood design provides easy accessibility to all frequent service points including radiators/coolers.
- ▶ **Rear view visibility** – 1 x 1 meter visibility, small turning radius plus rear angle of attack.
- ▶ **Easy cleaning of the fuel tank** – helps reduce trouble with contaminations in fuel or bad fuel quality.
- ▶ **Sleeker design** – still solid tough.
- ▶ **Optional extended 2-year warranty**

* CA250-II/280-II: The noise level is measured in accordance with the operational cycle described in EU directive 2000/14/EC on machines equipped for the EU market, on soft polymer material with vibration switched on and the operator's seat in the transport position. Guaranteed sound power level with plastic hood, LwA: 107 dB(A) Sound pressure level at the operator's ear (platform) with plastic hood, LpA: 86 dB(A) Sound pressure level at the operator's ear (cab) with plastic hood, LpA: 94 dB(A)
