

## Dynapac Compaction Control System - CompLogger

# Dynapac CompLogger

Let us introduce our new Compaction Control system, with wireless communication - the Dynapac CompLogger!

### Features

Presents the Compaction Meter value graphically.

Documentation of the compacted data.

Provides real-time information of the compaction progress.

Wireless communication with the roller.

High capacity battery for full day operation.

Rugged computers (IP67) water, dust and shockproof.

### Benefits

Continuous compaction data while compacting. Feedback to operator and supervisor.

All data stored electronically. Full documentation of the compacted area.

All data can be printed on paper or as PDF. Easy storage with full access. Saves paper and improves the overview.

Export of text data possible. Enables further analysis and creation of databases

The picture above shows the Dynapac CompLogger in natural size.
